

# LIGHTS FOR HAITI

Light up someone's life!

In Grand Bois our health center serves as a source of light for expectant mothers. There, at St. Vincent de Paul Health Center, mothers receive necessary care, are given a safe place to deliver their baby, and are gifted with a "Welcome Home Baby" basket containing items essential to care for their newborn at home. But most of all they are given hope for the future of their new family.

We want the sentiment of hope and health to remain once they travel back to their home, so we have created the Lights for Haiti program.

For just \$30, a new mother will take home a solar powered light that will ease the burden of caring for a new baby in a home without electricity. As part of your donation, you will receive a solar light of your own that we hope you will hang in your window to be a reminder of the light and hope you have given a new family.

To purchase a light, visit [www.servehaiti.org](http://www.servehaiti.org)
